	55,870,000 Meters	3,112 Tons	

By the end of October Hungary had delivered about 19 million meters of fabric. The waste or loss reverts to the manufacturers.

- 5. The Hungarian Supreme Economic Council has fixed the quality of the raw cotton at 86 per cent. Up to 31 July 1946, the cotton manufacturers received 1.163 kilograms of raw material and .185 kilograms of another grade for a total of 1.348 kilograms which yielded one kilo of No. 28 quality English thread. Since 1 August, 1.163 kilograms of raw cotton and .400 kilograms of another quality cotto for a total of 1.563 kilograms yielded one kilo of No. 28 quality English thread.
- 6. The weaving and finishing conditions up to 31 July were as follows:

Weaving:

70 grams raw cotton per running meter for the first

72 million maters

50 grams raw cotton for the balance.

Finishing:

130 grams raw cotton per running meter for printed merchandise

80 grams raw cotton per running meter for merchandise woven of dyed thread

37 grams raw cotton per running meter for unbleached merchandise.

- 7. New conditions for weaving and finishing for deliveries made after 1 August 1946 have not yet been established.
- 8. The Nemzetközi Textilipar és Textilkereskedelmi Incorporated has been established to fulfill the contract with the Soviet Union. The directorate of the company is comprised of members of the Hungarian textile industry and representatives of the Ministries of Industry, Finance, and Foreign Trade. The Soviet Union is represented in these transactions by the Society Exportlen of Moscow.
- 9. In 1941 there were 342,750 spindles available for spinning cotton; as a result of war damage and exports of machinery to Russia, this number dropped to 205,800. As of 3 October 1946, there were 231,000 spindles reported to be in Hungary.
